More More XSLT

There are more slides on XSLT on moodle that aren't examinable (slideset 21 and XML Schemas), just to show us that there is more to XSLT than we have learned. He estimates we've learned about 55%-60% of the language.

XML Schema

It's a successor to DTDs, which is much more powerful, but usually unnecessary.

For example, you can specify that things can only contain a certain data type e.g. numbers.

It allows you to define your own datatypes in terms of other ones.

Example
